

# SOLAR ROOF

## Funicular Form

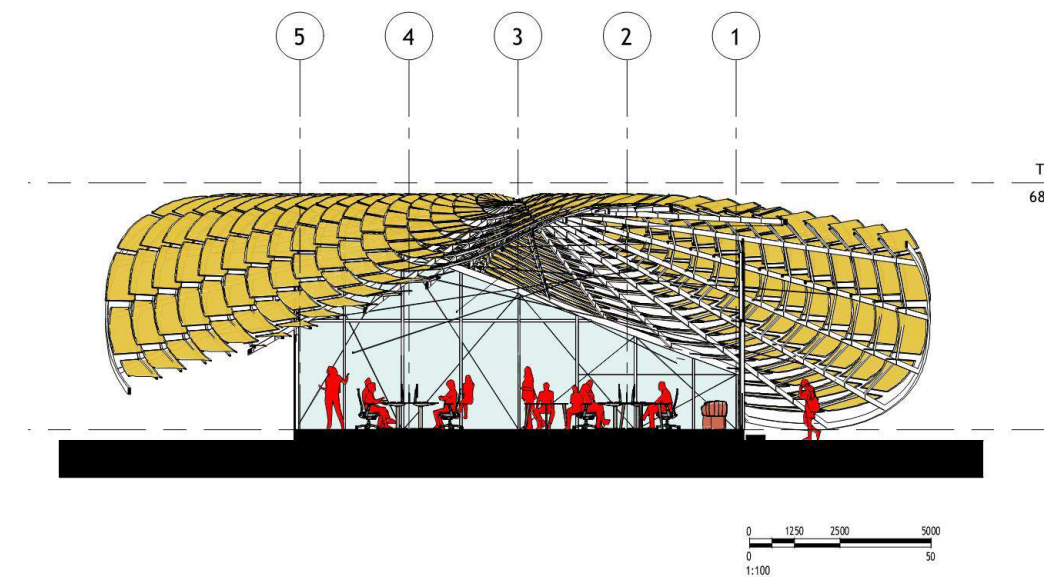

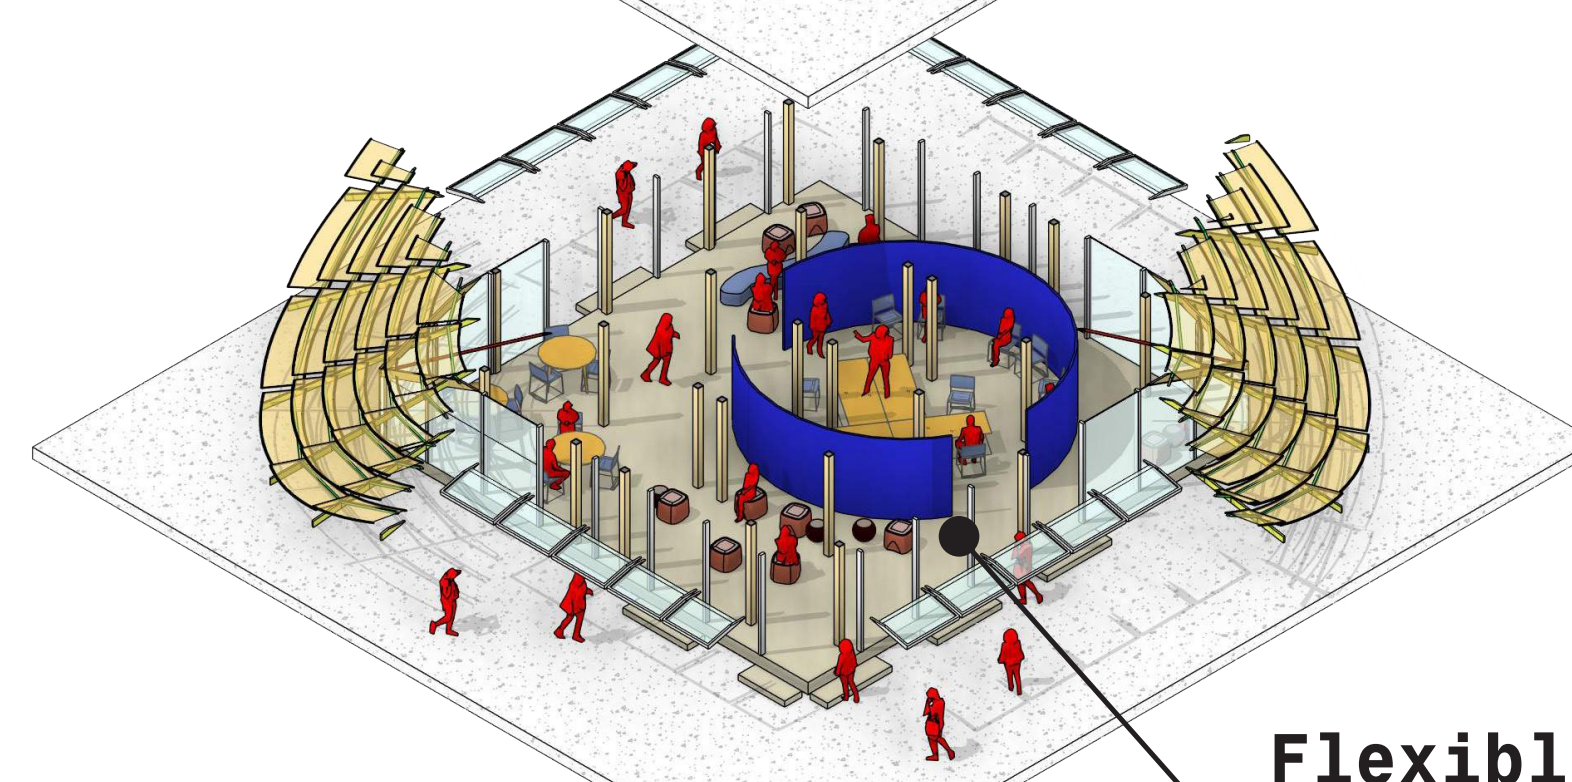

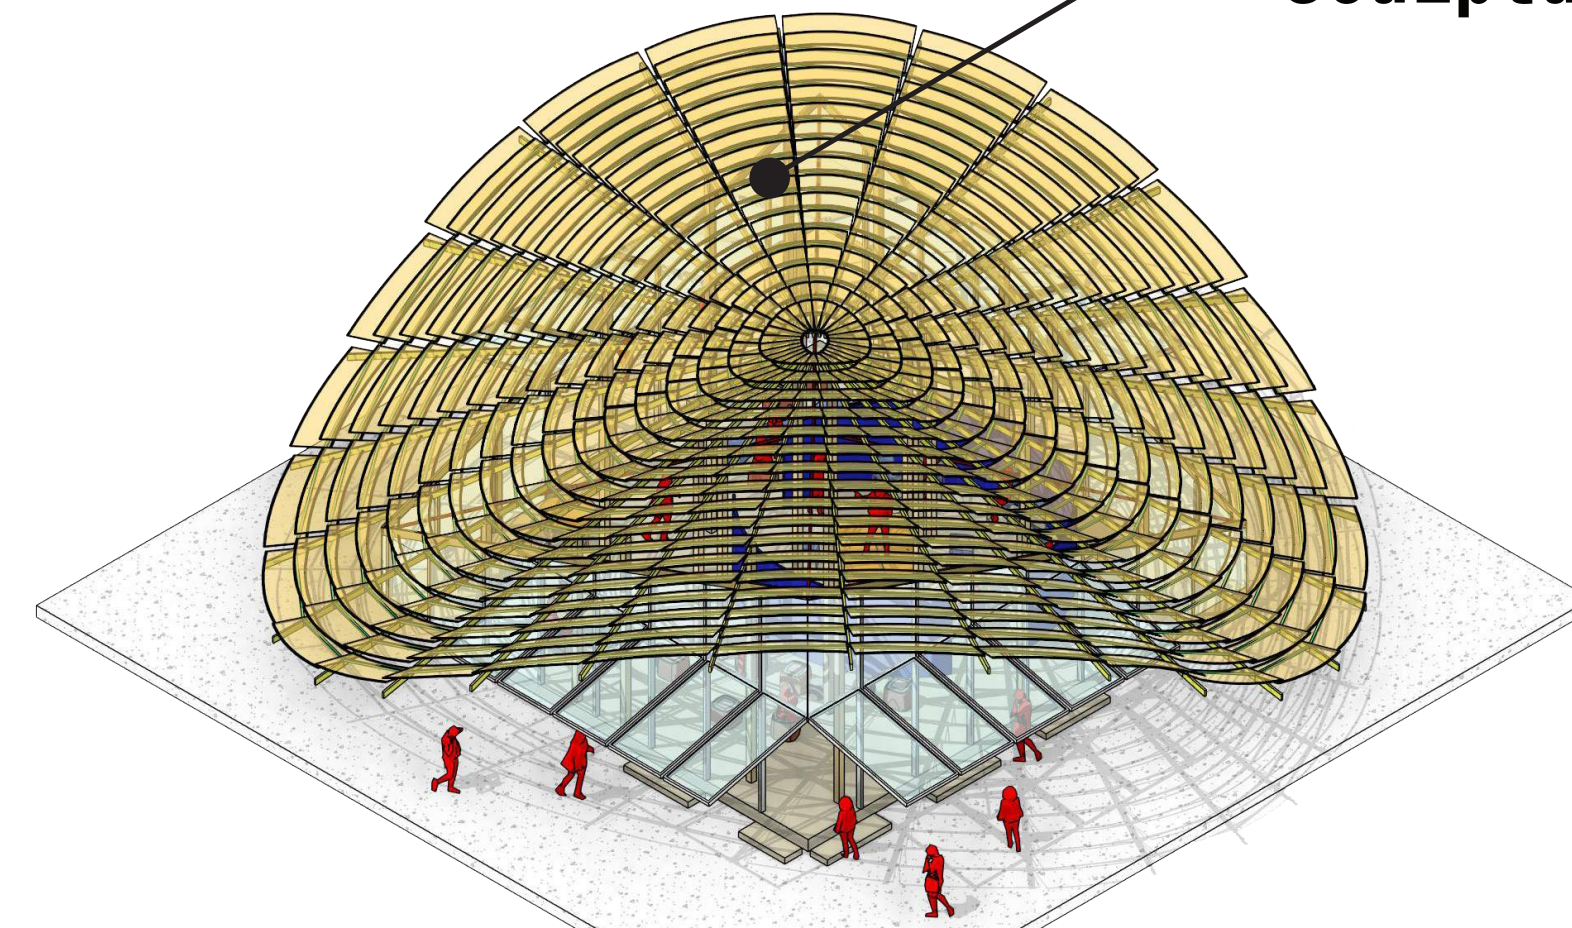

The flexible PV film works with a multitude of funicular forms

Solar Roof features a sculptural funicular roof integrated with flexible photovoltaic (PV) film, combining aesthetic design with renewable energy generation.

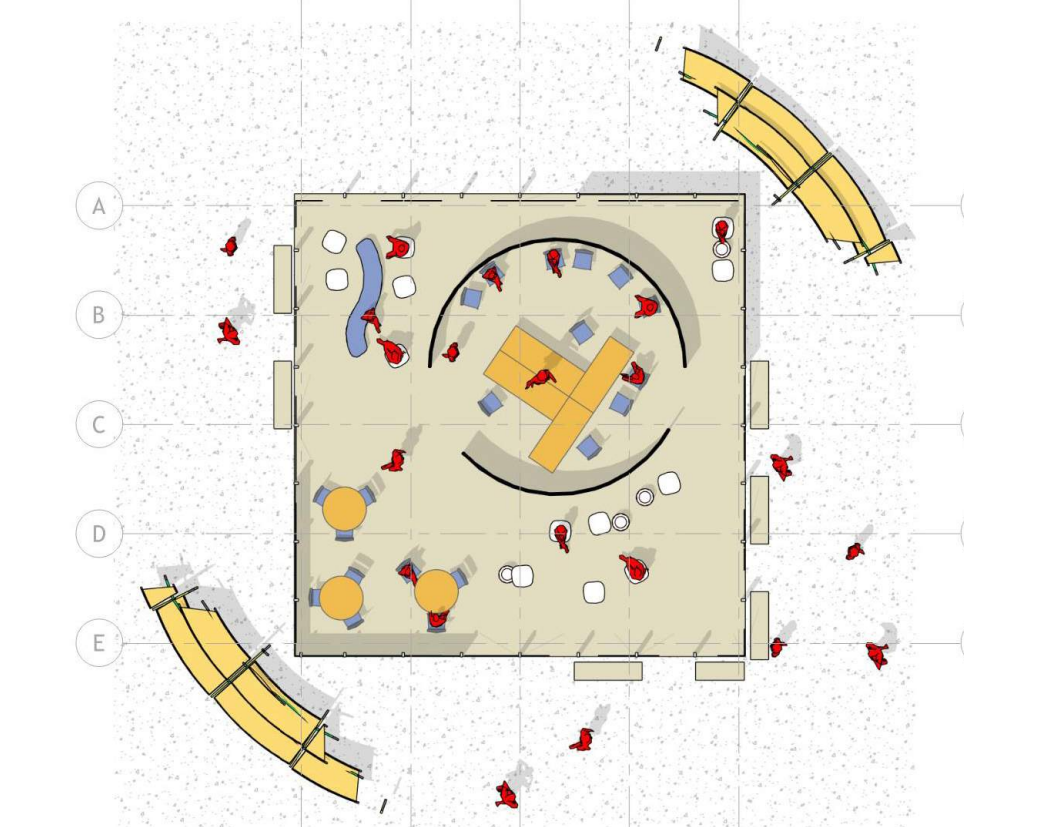

The adaptable interior is designed for multifunctional use, allowing for reconfigurable spaces that meet diverse work needs while utilizing sustainable materials and smart technology.

This project serves as a model for how new solar technology can harmoniously integrate sustainability, flexibility, and design to create energy-efficient, modern work environments.

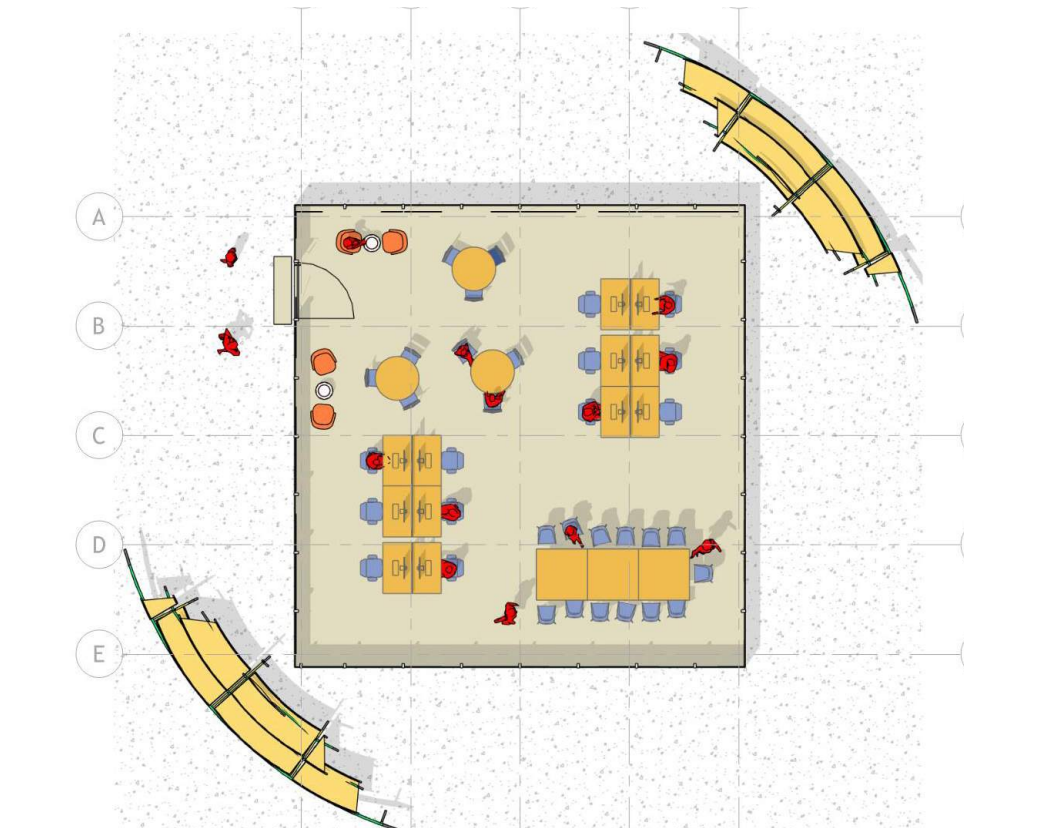

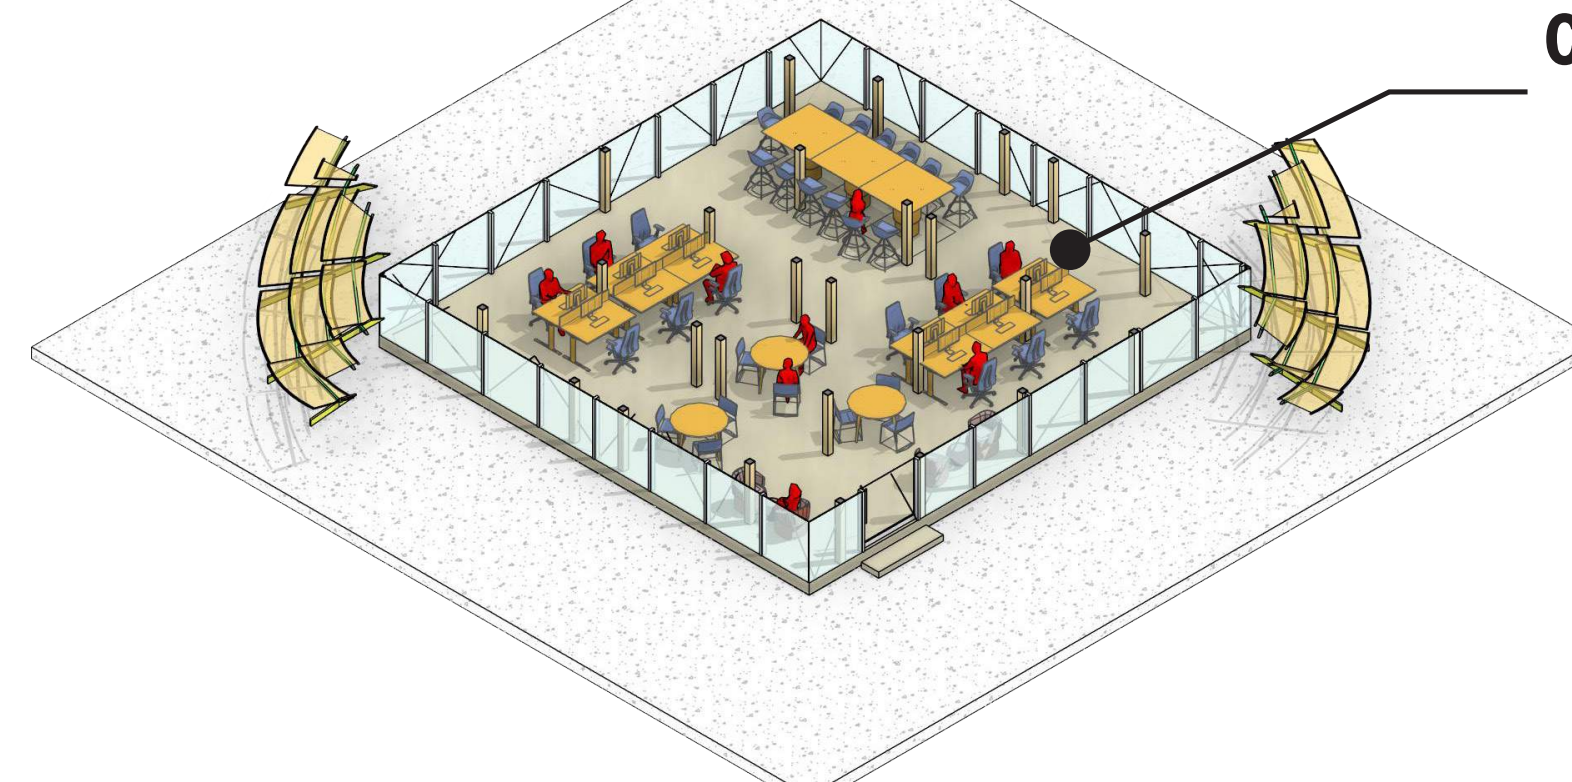

## Sculpture Roof

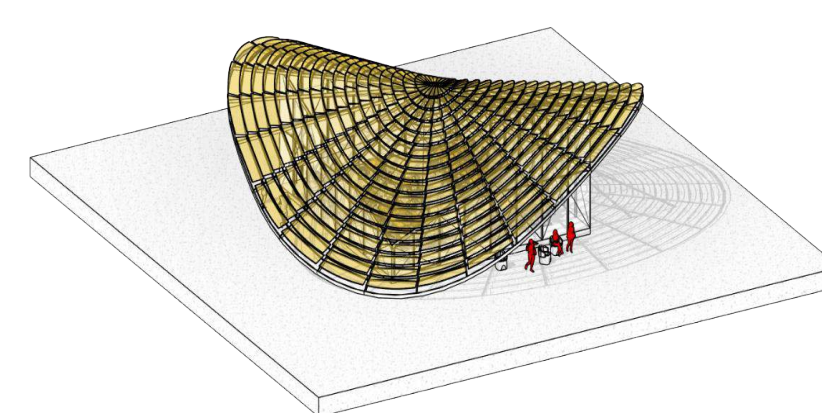

## Flexible layouts

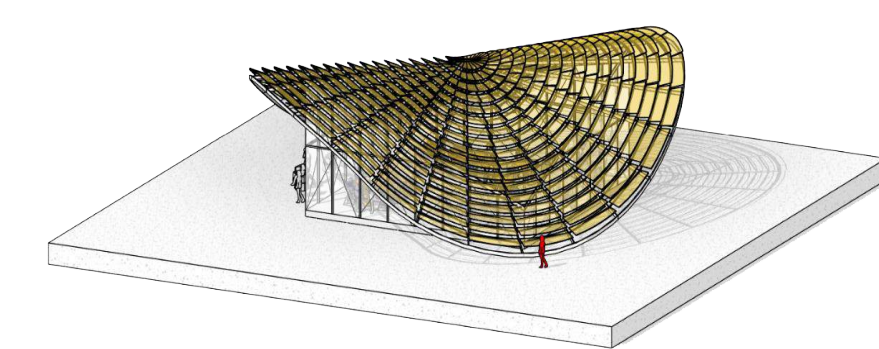

## Coworking

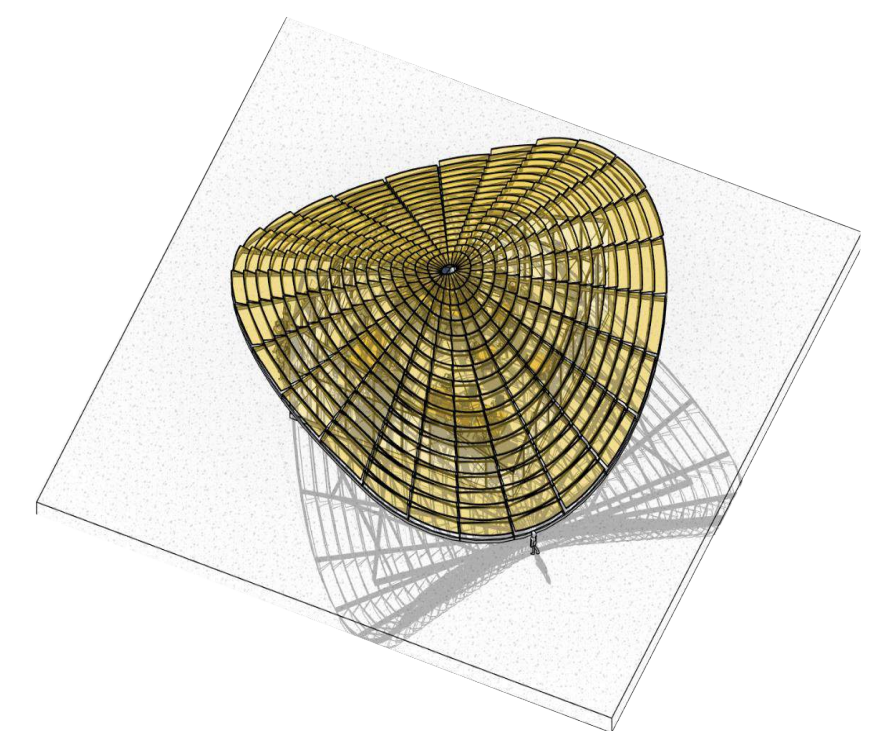

## 3 ways to engage solar roof on the exterior:

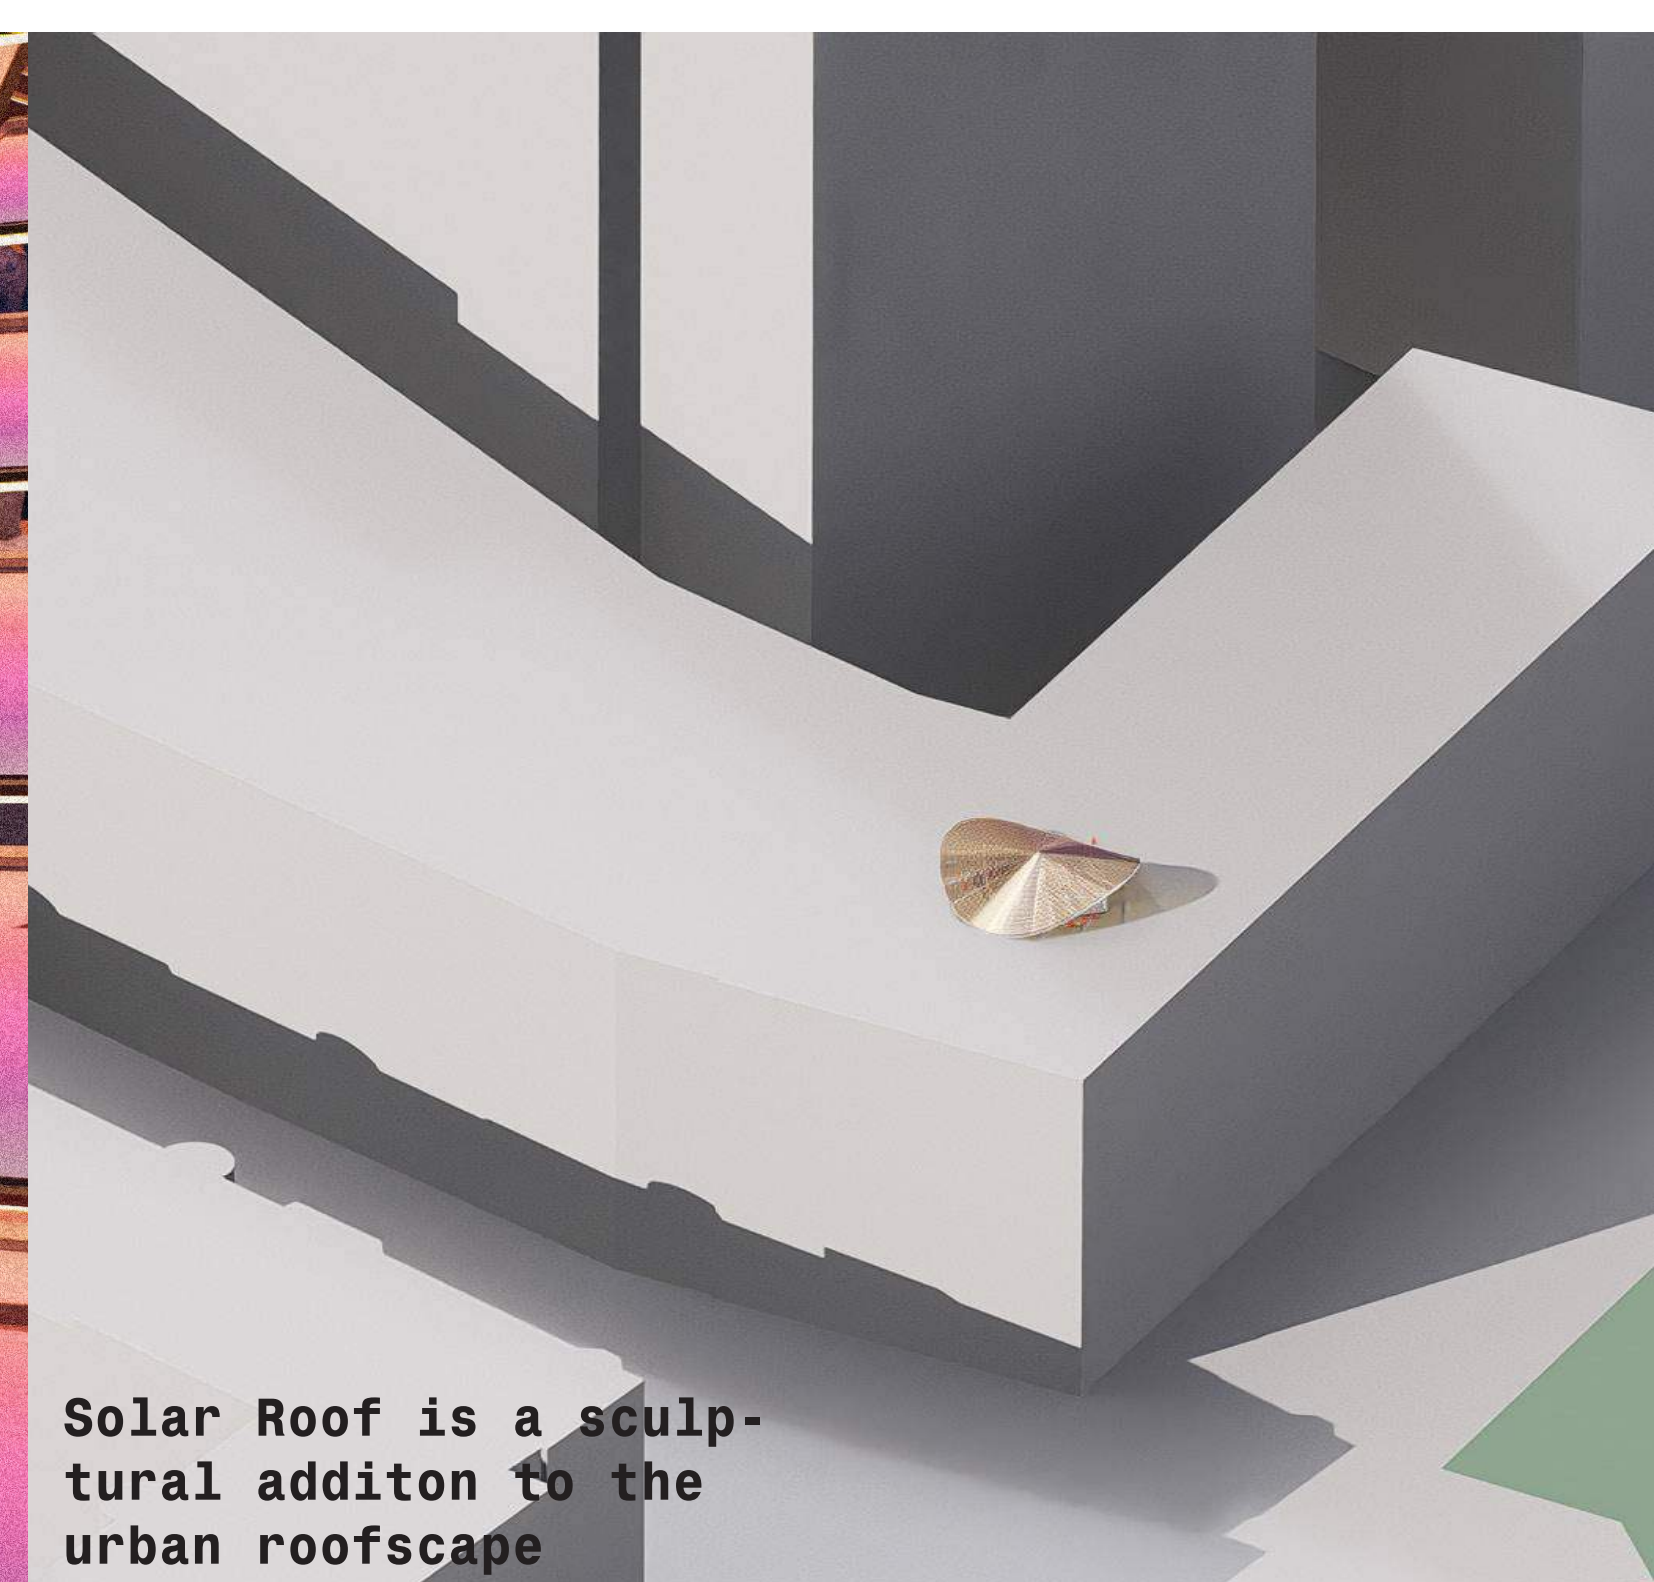

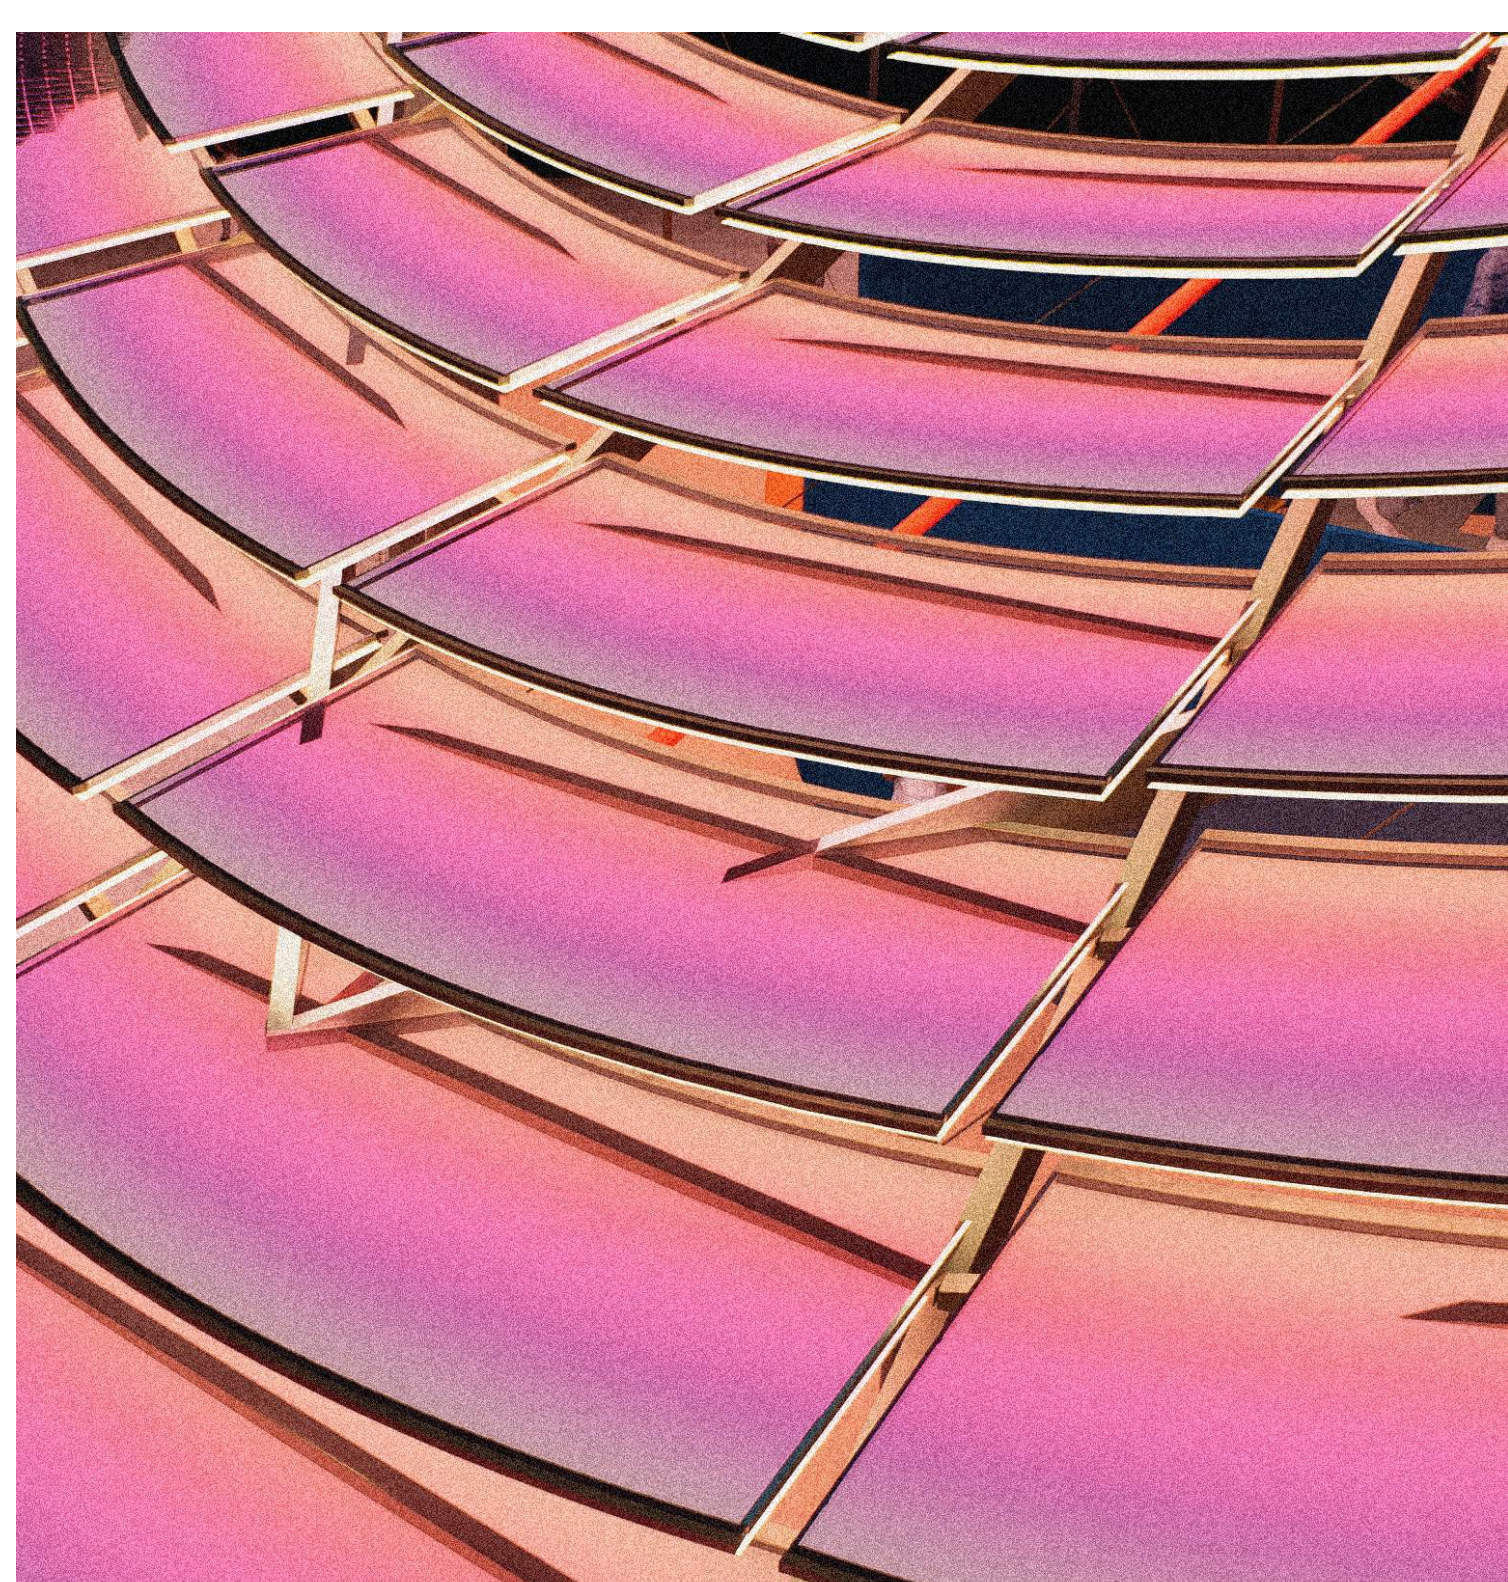

Shelter

Object of Contemplation

The Monumental Object

Solar Roof is a sculptural addition to the urban roofscape
